

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

Scorpion
\$SCORP

09/04/2024

TOKEN OVERVIEW

Fees

- Buy fees: 0%
- Sell fees: 10%

Fees privileges

- Can change sell fees up to 10%

Ownership

- Owned

Minting

- No mint function

Max Tx Amount / Max Wallet Amount

- Can't change max tx amount and / or max wallet amount

Blacklist

- Blacklist function not detected

Other privileges

- Can exclude / include from fees
 - Can exclude / include from rewards
-

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website <https://freshcoins.io>

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy (RUG or Honeypot etc)

INTRODUCTION

FreshCoins (Consultant) was contracted by **Scorpion** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

0xa910A46E2F2002Fa9B5aA85F35b9440F6DAC4b10

Network: **Binance Smart Chain (BSC)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **09/04/2024**

AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Low
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Passed
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

OWNER PRIVILEGES

- Contract owner can't mint tokens after initial contract deploy
- Contract owner can't exclude addresses from transactions
- Contract owner can exclude/include wallet from rewards

```
function excludeFromReward(address account) public onlyOwner {
    require(!_isExcluded[account], "Account is already excluded");
    if (_rOwned[account] > 0) {
        _tOwned[account] = tokenFromReflection(_rOwned[account]);
    }
    _isExcluded[account] = true;
    _excluded.push(account);
}

function includeInReward(address account) external onlyOwner {
    require(_isExcluded[account], "Account is already included");
    for (uint256 i = 0; i < _excluded.length; i++) {
        if (_excluded[i] == account) {
            _excluded[i] = _excluded[_excluded.length - 1];
            _tOwned[account] = 0;
            _isExcluded[account] = false;
            _excluded.pop();
            break;
        }
    }
}
```

- Contract owner can exclude/include wallet from tax

```
function excludeFromFee(address account) public onlyOwner {
    _isExcludedFromFee[account] = true;
    _isExcludedFromBurnFee[account] = true;
}

function includeInFee(address account) public onlyOwner {
    _isExcludedFromFee[account] = false;
    _isExcludedFromBurnFee[account] = false;
}
```

- Contract owner can change marketingWallet address

Default value:

marketingWallet: 0x8595f4c7bE4bc6d2Bc2a3DB8036810B58716B4EB

```
function setMarketingWallet(address _addr) external onlyOwner {
    require(_addr != address(0), "Invalid address");
    marketingWallet = _addr;
}
```

● Contract owner can change swap settings

```
function setNumTokensSellToAddToLiquidity(uint256 amount)
    external
    onlyOwner
{
    require(amount >= 10000, "BEP20: setNumTokensSell should be 10k minimum.");
    numTokensSellToAddToLiquidity = amount * 10 ** _decimals;
}

function setSwapAndLiquifyEnabled(bool _enabled) external onlyOwner {
    swapAndLiquifyEnabled = _enabled;
    emit SwapAndLiquifyEnabledUpdated(_enabled);
}
```

● Contract owner can change sell fees up to 10%

```
function setSellFees(
    uint256 tFee,
    uint256 lFee,
    uint256 mFee,
    uint256 bFee
) external onlyOwner {
    uint256 toFees = tFee+lFee+mFee+bFee;
    require(toFees <= 10, "BEP20: Maximum SELL fees allowed is 10%");
    _sellRefFee = tFee;
    refFee = _sellRefFee;
    _sellLiquidityFee = lFee;
    liquidityFee = _sellLiquidityFee;
    _sellMarketingFee = mFee;
    marketingFee = _sellMarketingFee;
    _sellBurnFee = bFee;
    burnFee = _sellBurnFee;
}
```

● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {
    require(
        newOwner != address(0),
        "Ownable: new owner is the zero address"
    );
    emit OwnershipTransferred(_owner, newOwner);
    _owner = newOwner;
}
```

● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {
    emit OwnershipTransferred(_owner, address(0));
    _owner = address(0);
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
