

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

Bino Token
\$BINO

26/03/2024

TOKEN OVERVIEW

Fees

- Buy fees: 4%
- Sell fees: 4%

Fees privileges

- Can't change fees

Ownership

- Owned

Minting

- No mint function

Max Tx Amount / Max Wallet Amount

- Can't change max tx amount and max wallet amount

Blacklist

- Blacklist function not detected

Other privileges

- Can exclude / include from fees
-

INTRODUCTION

FreshCoins (Consultant) was contracted by **Bino Token** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

0xcF2a790bCF171D2B29B1EfC7c6D834Ee883aa665

Network: **Binance Smart Chain (BSC)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **26/03/2024**

AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

| No. | Issue description | Checking Status |
|-----|--------------------------------|-----------------|
| 1 | Compiler Errors / Warnings | Passed |
| 2 | Reentrancy and Cross-function | Passed |
| 3 | Front running | Low |
| 4 | Timestamp dependence | Passed |
| 5 | Integer Overflow and Underflow | Passed |
| 6 | Reverted DoS | Passed |
| 7 | DoS with block gas limit | Low |
| 8 | Methods execution permissions | Passed |
| 9 | Exchange rate impact | Passed |
| 10 | Malicious Event | Passed |
| 11 | Scoping and Declarations | Passed |
| 12 | Uninitialized storage pointers | Passed |
| 13 | Design Logic | Passed |
| 14 | Safe Zeppelin module | Passed |

OWNER PRIVILEGES

- Contract owner can't mint tokens after initial contract deploy
- Contract owner can't exclude addresses from transactions
- Contract owner can exclude/include wallet from tax and tx limitations

```
function excludeFromFee(address account) public onlyOwner {
    _isExcludedFromFee[account] = true;
}

function includeInFee(address account) public onlyOwner {
    _isExcludedFromFee[account] = false;
}
```

- Contract owner can exclude/include wallet from rewards

```
function excludeFromReward(address account) public onlyOwner() {
    require(!_isExcluded[account], "Account is already excluded");
    if (_rOwned[account] > 0) {
        _tOwned[account] = tokenFromReflection(_rOwned[account]);
    }
    _isExcluded[account] = true;
    _excluded.push(account);
}

function includeInReward(address account) external onlyOwner() {
    require(_isExcluded[account], "Account is not excluded");
    for (uint256 i = 0; i < _excluded.length; i++) {
        if (_excluded[i] == account) {
            _excluded[i] = _excluded[_excluded.length - 1];
            _tOwned[account] = 0;
            _isExcluded[account] = false;
            _excluded.pop();
            break;
        }
    }
}
```

- Contract owner can change swap settings (with threshold)

```
function updateSwapTokensAtAmount(uint256 amount) external onlyOwner {
    require(amount >= 500, "Swap amount should not be 0");
    swapTokensAtAmount = amount * 10 ** _decimals;
}
```

● Contract owner can change `marketingAddress` address

Default value:

`marketingAddress`: `0x10A11863b25302CB1d2E549A206254ff3839CC19`

```
function updateMarketingWallet(address newWallet) external onlyOwner {
    require(
        newWallet != address(0),
        "The marketing wallet cannot be the value of zero"
    );
    require(!newWallet.isContract(), "Marketing wallet cannot be a contract");
    marketingAddress = newWallet;
}
```

● Contract owner has ability to retrieve any token held by the contract

Native tokens excluded

```
function rescueBNB(uint256 weiAmount) external onlyOwner {
    require(address(this).balance >= weiAmount, "insufficient BNB balance");
    payable(msg.sender).transfer(weiAmount);
}

function rescueAnyBEP20Tokens(address _tokenAddr, address _to, uint _amount) external onlyOwner {
    require(_tokenAddr != address(this), "Cannot transfer out Token123!");
    IERC20(_tokenAddr).transfer(_to, _amount);
}
```

● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {
    require(newOwner != address(0), "Ownable: new owner is the zero address");
    _setOwner(newOwner);
}
```

● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {
    _setOwner(address(0));
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

TOKEN DETAILS

Details

| | |
|-------------|---------|
| Buy fees: | 4% |
| Sell fees: | 4% |
| Max TX: | 50,000 |
| Max Wallet: | 500,000 |

Honeypot Risk

| | |
|------------------|--------------|
| Ownership: | Owned |
| Blacklist: | Not detected |
| Modify Max TX: | Not detected |
| Modify Max Sell: | Not detected |
| Disable Trading: | Not detected |

Rug Pull Risk

| | |
|------------|----------------------|
| Liquidity: | N/A |
| Holders: | 100% unlocked tokens |

BINO TOKEN ANALYTICS & TOP 10 TOKEN HOLDERS

The top 10 holders collectively own 100.00% (1,000,000.00 Tokens) of Bino Token

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
