

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

SnoozeDoge
\$SNOZ

26/03/2024

TOKEN OVERVIEW

Fees

- Buy fees: 0%
- Sell fees: 0%

Fees privileges

- Can't change / set fees

Ownership

- Owned

Minting

- No mint function

Max Tx Amount / Max Wallet Amount

- Can't change max tx amount or wallet amount

Blacklist

- No blacklist function

Other privileges

- Burnable token
-

TABLE OF CONTENTS

- 2 **INTRODUCTION**
- 3 **WEBSITE + SOCIALS**
- 4-5 **AUDIT OVERVIEW**
- 6-8 **OWNER PRIVILEGES**
- 9 **CONCLUSION AND ANALYSIS**
- 10 **TOKEN DETAILS**
- 11 **SNOZ TOKEN ANALYTICS & TOP 10 TOKEN HOLDERS**
- 12 **TECHNICAL DISCLAIMER**

DISCLAIMER

The information provided on this analysis document is only for general information and should not be used as a reason to invest.

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website <https://freshcoins.io>

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy (RUG or Honeypot etc)

INTRODUCTION

FreshCoins (Consultant) was contracted by **SnoozeDoge** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

0x0F05696C92AF8759f55530e1570b7F1d73327E08

Network: **Avalanche (AVAX)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **26/03/2024**

AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Passed
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Passed
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

OWNER PRIVILEGES

- Contract owner can't mint tokens after initial contract deploy.
- Contract owner can't disable trading.
- Contract owner can't exclude an address from transactions.
- Contract owner can't set / change buy & sell taxes.
- Contract owner can't change swap settings.
- Contract owner can't change tx amount
- Burnable token

The smart contract was deployed through the bitbond.com website

(Version defi_v_3 string)

Was listed several settings associated with this deployment:

isBurnable: True

isDeflationary: False

isDocumentUriAllowed: False

isMaxAmountOfTokensSet: False

isMaxSupplySet: False

isMintable: False

isReflective: False

isTaxable: False

The functions associated with these settings are not available in the smart contract. This means that despite these settings being applied during deployment, the functionalities they represent might not be implemented or accessible within the contract code. Therefore, users interacting with this contract may not be able to utilize features such as imposing a maximum supply, or minting new tokens, among others, depending on the specific settings and associated functions

● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {
    require(newOwner != address(0), "Ownable: new owner is the zero address");
    _transferOwnership(newOwner);
}

function _transferOwnership(address newOwner) internal virtual {
    address oldOwner = _owner;
    _owner = newOwner;
    emit OwnershipTransferred(oldOwner, newOwner);
}
```

● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {
    _transferOwnership(address(0));
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

TOKEN DETAILS

Details

Buy fees: 0%

Sell fees: 0%

Max TX: N/A

Max Sell: N/A

SNOZ TOKEN ANALYTICS & TOP 10 TOKEN HOLDERS

The top 10 holders collectively own 100.00% (1,000,000,000.00 Tokens) of SnoozeDoge

Token Total Supply: 1,000,000,000.00 Token | Total Token Holders: 2

SnoozeDoge Top 10 Token Holders

Source: snowscan.xyz

(A total of 1,000,000,000.00 tokens held by the top 10 accounts from the total supply of 1,000,000,000.00 token)

Rank	Address	Quantity (Token)	Percentage
1	0x58Da673e...9cB6415f7	989,800,000	98.9800%
2	0x1e399650...Ba73cf013	10,200,000	1.0200%

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
