

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

Decentralized Finance
\$DCF

12/09/2024

TOKEN OVERVIEW

Fees

- Buy fees: 3%
- Sell fees: 3%

Fees privileges

- Can change fees up to 10%

Ownership

- Owned

Minting

- No mint function

Max Tx Amount / Max Wallet Amount

- Can't change max tx amount and / or max wallet amount

Blacklist

- Blacklist function not detected

Other privileges

- Can exclude / include from fees
-

DISCLAIMER

The information provided on this analysis document is only for general information and should not be used as a reason to invest.

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website <https://freshcoins.io>

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy (RUG or Honeypot etc)

INTRODUCTION

FreshCoins (Consultant) was contracted by **Decentralized Finance** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

0x9C770376a4c996Ee14aEa1323461fcFB816F7FBC

Network: **Binance Smart Chain (BSC)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **12/09/2024**

AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Low
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Passed
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

OWNER PRIVILEGES

- Contract owner can't mint tokens after initial contract deploy
- Contract owner can't exclude an address from transactions
- Contract owner can exclude/include wallet from tax

```
function excludeFromFees(address account, bool excluded) public onlyOwner {
    _excludeFromFees(account, excluded);
}
```

- Contract owner can change fees up to 10%

```
function _updateFees(uint256 _buyFee, uint256 _sellFee) private {
    require(_buyFee <= 1_000 && _sellFee <= 1_000, "Invalid fees"); // _buyFee and _sellFee <= 10%
    buyFee = _buyFee;
    sellFee = _sellFee;
}
```

- Contract owner can change feeWallet address

Current value:

feeWallet: 0x22B56E228e54F92E773BD9fDf0cFa3F0a2c4DA4D

```
function _updateFeeWallet(address _feeWallet) private {
    require(_feeWallet != address(0), "Zero address");
    feeWallet = _feeWallet;
}
```

- Contract owner has ability to retrieve any token held by the contract

Native tokens NOT excluded

```
function withdrawStuckNative(address toAddr) external onlyOwner {
    (bool success, ) = toAddr.call{value: address(this).balance}("");
    require(success);
}

function withdrawStuckToken() external onlyOwner {
    uint256 balance = IERC20(address(this)).balanceOf(address(this));
    IERC20(address(this)).transfer(msg.sender, balance);
    payable(msg.sender).transfer(address(this).balance);
}
```

● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {  
    if (newOwner == address(0)) {  
        revert OwnableInvalidOwner(address(0));  
    }  
    _transferOwnership(newOwner);  
}  
  
function _transferOwnership(address newOwner) internal virtual {  
    address oldOwner = _owner;  
    _owner = newOwner;  
    emit OwnershipTransferred(oldOwner, newOwner);  
}
```

● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {  
    _transferOwnership(address(0));  
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

DCF TOKEN ANALYTICS & TOP 10 TOKEN HOLDERS

The top 10 holders collectively own 100.00% (2,600,000,000.00 Tokens) of Decentralized Finance

Token Total Supply: 2,600,000,000.00 Token | Total Token Holders: 3

Decentralized Finance Top 10 Token Holders

Source: BscScan.com

(A total of 2,600,000,000.00 tokens held by the top 10 accounts from the total supply of 2,600,000,000.00 token)

Rank	Address	Quantity (Token)	Percentage
1	Pinksale: PinkLock V2	2,548,000,000	98.0000%
2	0xc9fc5405...dEEF7ec02	39,900,000	1.5346%
3	0x8F9Fd128...24fdf6E30	12,100,000	0.4654%

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
