The smart contract was deployed through the **fatsale.finance** website  
Was listed several settings associated with this deployment:

**enableChangeTax:** False

**enableKillBlock:** False

**enableOffTrade:** False

**enableRewardList:** False

**enableSwapLimit:** False

**enableTransferFee:** False

**enableWalletLimit:** False

The functions associated with these settings are not available in the smart contract. This means that despite these settings being applied during deployment, the functionalities they represent might not be implemented or accessible within the contract code. Therefore, users interacting with this contract may not be able to utilize features such as enable/disable trade, or change tax, among others, depending on the specific settings and associated functions

# CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.
